

## Blast Golf

Blast Golf is the first real-time motion capture technology that combines full swing driving and putting metrics with Smart Video Capture™ technology. This allows golfers of all skill levels to capture their swing speed, loft and lie data and other data points while seeing the mechanics of their own motion in real time – all from an iPhone or iPad. Blast Golf has introduced a new adaptive slow mo functionality that gives even greater insights into your game, giving you a competitive edge.

Blast Golf's precision motion sensor is a quarter-sized device which is the first of its kind. The one-of-a-kind removable motion sensor analyzes and records putts and full swings for 8 hours and you can then easily share your highlights with your friends via Facebook, Twitter and E-mail.

There's no need to alter your natural swing or putting stroke, and there are no power buttons or controls to get in your way. The Blast motion sensor knows when you're moving and dynamically powers-up the sensor and engages the patented motion detection algorithms to capture your important 3D action metrics in real-time.

This product is quickly gaining popularity across the PGA Tour as well. PGA Championship winner and tour veteran, Jeff Sluman, uses Blast Golf to monitor his timing and face angle rotation. Sluman says: "I now feel I can make everything I look at."

Blast Golf fully charges in 1.5 hours with its included wireless charging base. Bluetooth® Smart connects the sensor mounted on the driver or putter shaft to your iOS device. The Blast Golf iOS app is designed for iPhone 6/6+, iPhone 5, iPad 3 / iPad Mini 2 and iPod Touch 5th generation or newer.

Blast Golf is available at BlastMotion.com and bestbuy.com for \$149.95. For more information visit [www.blastmotion.com](http://www.blastmotion.com).
